INTELLIGENT INTEGRATED CONNECTED

WELCOME TO REGIONCHARGE!

RegionCharge takes **greentech innovation** out of the city and **into the country** by building Aussie-made electric vehicle charging infrastructure in regional and rural areas.

RegionCharge promotes:

Australian-made AC EV charging

Development of local skills & innovation

Community pride & placemaking

EV tourism & low-emission transport uptake

# REGION/CHARGE IS SHOVEL READY

We can help you roll out your RegionCharge project in as little as a few weeks. Here's a high level overview of how it works:

Virtual  
discussion

Design &  
components

Install,  
commission & test

Connect to  
network

RegionCharge  
Plan

Start  
assembly

Your  
RegionCharge  
project is online!

## REGIONCHARGE FAQs

### How does Region Charge Work?

RegionCharge uses EV charging units that are assembled in the community that they will be installed in. They are then installed by a local electrician to help build EV skills and knowledge in regional areas.

### Where will the chargers go?

The Region Charge team are experienced professionals in EV charging solutions, and will work with you to build a RegionCharge Plan to identify locations that will benefit local & visiting EV drivers.

### Who assembles the units?

The goal of RegionCharge is to engage community groups to assemble charging units, giving those groups a rare insight into how e-mobility technology works. Any group can take part in RegionCharge.

### How is everything organised?

If you'd like to charge your region, the EVUp team will prepare a RegionCharge Plan that will help you coordinate the whole project.

### Is prior electrical experience required?

No! The goal of RegionCharge is to introduce greentech to communities who wouldn't usually experience it, so assembly is designed to be simple. The assembly process is supervised by a qualified electrician.

### Why choose RegionCharge?

EVs are coming & it's only a matter of time before your community will demand access to reliable public charging. Not only is RegionCharge a community-focused solution, it carries significant value over many off the shelf competitors.
